Chapter 1: Fractions

Lesson 1: Equivalent Fractions

Fractions describe equal parts of a whole.

Multiplying numerator and denominator by the same nonzero number preserves the value. For example, 1/2 equals 2/4.

A learner can compare shaded rectangles divided into equal parts.

Chapter 2: Geometry

Lesson 2: Area of a Rectangle

A rectangle has four right angles.

Area = length multiplied by width.

Example: 5 cm by 3 cm has area 15 square cm.
